## EXPERIENCE

**Vendito Corp** **Oct 2024- Present**
*Full Stack Developer - II* *(Full-time)*

- Built a full-stack multivendor eCommerce platform (web + admin + PoS) using Laravel and Nuxt 3, supporting vendor onboarding, RBAC, and order management, bilingual support
- Architected a live selling feature with AWS IVS video streaming and Pusher-driven real-time auction/bid system
- Integrated Gemini API for AI-powered price recommendations, product description generation, and natural language search
- Built a Creators/Influencer marketplace module for brand-influencer campaign management
- Developed analytics dashboards, as well as a manual orders system in the admin panel
- Managed AWS infrastructure, cross-region migration, and production incident response
- Integrated Stripe and KNet payment gateways; implemented Twilio 2FA and phone authentication

Previously contributed part-time Mar–Oct 2024 before joining full-time

**TechGrowth** **Feb 2023 – Sept 2024**
*Full Stack Developer & QA Officer* *(Full-time)*

- Built and maintained 20+ websites using React, Laravel, Express and built APIs for mobile apps..
- Developed booking systems, custom CMS platforms, and improved client SEO by ~65%.
- Integrated payment gatewaysand worked on RAG based AI chatbot/ML projects.
- Created and refactored Shopify sites using Liquid and custom middleware with Shopify APIs.
- Led QA efforts, wrote technical documents, and delivered training; tracked bugs via Jira & Sentry.

*Frontend Developer & QC Officer* **Aug 2022 – Jan 2023**

- Delivered high-priority UI features under rapid release cycles, translating design from Zeplin & Figma
- Designed edge case test scenarios, wrote bug reports,, ensuring high stability before handoffs.
- Built functional UI prototypes and live mockups for experimental IT solutions, helping the business pitch and validate concepts with non-technical stakeholders.

**Shopify Partner** **Aug 2022 – Present**
*Clients: Limae, OrionStrom, Arabia Fragrances etc* *(Part-time)*

- Customized Shopify themes and built dynamic sections using Liquid and JavaScript.
- Integrated third-party apps and resolved frontend bugs to enhance store functionality and UX
- Handled internationalization (currency, IP blocker, market setup).
- Integrated Klaviyo for marketing & SEO: updated meta info & Google Search Console set.
